Acoustic louvre doors now available with SR2 and SR3 security rating

Premier Security Ballistic & Blast scored a first in 2019 when they became the UK's only supplier of certificated acoustic-rated steel louvre doors **WITH** LPS1175 SR2 and SR3 security rating.

Traditional acoustic louvre doors have been viewed as a potential security weak-link, but Premier's SR2 and SR3 testing with the **(BRE)** British Research Establishment has taken the product to a whole new level.

Premier successfully tested three security-acoustic louvres:

- ☑ AC1910-190mm 14dB (Rw)
- ☑ AC 300-300mm 19dB (Rw)
- ☑ AC 380 –380mm 23dB (Rw)

Premier's louvres have been fire-tested by the BRE (British Research Establishment)
