Hostile Vehicle Mitigation - Anti-terrorism Curtain-Walling Security Systems & High Security Bollards

premier-ssl.com

Premier Security Ballistic & Blast Ltd

HVM Anti-terrorism and High Security bollards

An anti-terrorism bollard tested and certified (crash-rated) as a single bollard by an independent company according to standards IWA14-1:2013 Bollard V/7200 [N3C]/80/90:4.6. Each bollard has an independent pump so that in the event of a control unit failure, the other bollards in the environment remain functional.

Premier's range of HVM solutions includes anti-terrorism bollards designed and tested to withstand impact from vehicles travelling at up to 50mph.

SOLUTIONS FOR AVERSE HVM RESTRICTIONS

Some high-risk areas are precluded from using HVM barriers and bollards because of space restrictions. Premier's HVM-tested curtain-walling system is a solution many security-conscious clients are electing to use.

TARGETING CARBON NEUTRALITY

Premier Security Ballistic & Blast Ltd is dedicated to a positive legacy through sustainable security product fabrication and maintenance.

We aim to reduce resource consumption, enhance community well-being for a healthier environment and achieve our carbon neutral targets by implementing energy-efficient processes and investing in renewable resources.

HVM CURTAIN-WALLING

HVM Anti-terrorism Curtain-Walling Security system

Premier Security Ballistic & Blast Ltd's HVM Ultimate High-Security curtain-walling system is tested to ISO 22343-1 NSA LPS1175E10(SR5); D10 (SR4); C5 (SR3) and B3 (SR2) security and certified to 6 metres high with unlimited screen width.

Premier's glazed curtain-wall system now achieves ballistic FB7 standard and was recently successfully tested to resist 14.5mm AP (Armoured Piercing) penetration. It has a U-Value of 0.5. and also achieves a blast-resistance EXV 10 (Louvers); EXV 15 (Screens) and EXV 25

Approved to ISO 9001
LPCB Ref no 3297
